

**Critical Watch Moves Corporate Offices**  
***Innovator in security risk and compliance relocates to accommodate growth***

September 26, 2007 – (Dallas, Texas) – Critical Watch is steadily growing as a strong industry leader in the security risk and compliance management space. Continuing on this path of solid, profitable expansion, the Dallas-based provider of solutions that drive sustainable enterprise processes by automating key security and compliance tasks is moving to a larger location to accommodate its increasing business. This expanded location, near their current office in Dallas, Texas, is designed to foster open communication and provide more opportunities for collaboration among departments. The move is scheduled for the end of September.

“Providing customers with the most advanced security risk and compliance management solutions and support has been our priority throughout our seven years of business,” said Critical Watch CEO David Laizerovich. “That we’ve been able to profitably sustain and grow the business while delivering an exceptional customer experience is what we’re most proud of.”

In addition to the move, other 2007 Critical Watch milestones include: the release of a version of its FusionVM product designed for Managed Service Providers, FusionVM MSP in April; the introduction of an integrated, all-in-one appliance in August; and a recent expansion of its international install base to include the African continent.

**About Critical Watch**

Critical Watch is a leading provider of security risk management and compliance solutions that enable a comprehensive business process for integrating vulnerability management across the enterprise. In addition to its FusionVM suite of products and services, Critical Watch provides PCI Compliance services as a certified vendor. Critical Watch clients are Global 2000 enterprises across verticals such as healthcare, financial services, state and local government, e-commerce and manufacturing. FusionVM empowers organizations to:

- Efficiently and effectively manage business critical risks across the enterprise
- Establish better visibility, measurability and control over their security function
- Coordinate and embed a preventive process across all operational groups
- Validate regulatory and policy compliance
