

**Critical Watch CIO Leads PCI DSS 1.1 Discussion at SecureWorld Expo in Dallas
Eva Bunker, CISSP and entrepreneur educates conference attendees in PCI solutions**

November 13, 2007 – (Dallas, Texas) – PCI is one of the newest and least understood compliance standards, but it has the most immediate possible financial impact. Critical Watch CIO and co-founder Eva Bunker will join industry colleagues as part of a panel discussion surrounding implementation, strategy and best practices of PCI DSS 1.1. Designed to help security professionals navigate a complex set of challenges, this informative session is presented on November 15, 2007 as part of SecureWorld Expo in Dallas, Texas.

Ms. Bunker directs overall technology strategy and implementation. In addition, she is responsible for research, design and development of all product offerings. Her insight into existing and emerging technology, as well as the industry as a whole, will give participants a firm understanding of compliance issues, requirements, challenges and solutions.

“I am looking forward to a valuable exchange about complex and necessary requirements we all face,” said Ms. Bunker. “As commerce and security are interlinked we must stay on top of execution and properly manage those requirements across the enterprise. Our goal as a panel is to provide participants with clearly defined and effective strategies for compliance.”

Ms. Bunker is a dedicated member of the security community. She often speaks at conferences and seminars. Her professional memberships include Dallas Infragard and participation in the PCI Security Standards Council.
